

SUCCESS CASES OF THE STATE OF MINAS GERAIS/BRAZIL

SUSTAINABLE PROJECTS

Integrated plan to adapt and combat climate change for the semi-arid region of Minas Gerais

Objective: Preparation of the Integrated Plan for adaptation and coping with climate change for the semi-arid region of Minas Gerais, seeking to deepen knowledge about risks and adaptation options, in order to support the government in directing actions. With this, it is expected that the population in this context will have guarantees of resilience to impacts, which translates into protection and quality of life.

Object: Hiring a specialized legal entity to prepare the Integrated Plan and develop the web environment. Deliveries:

- Integrated Plan for adaptation and coping with climate change for the semi-arid region of Minas Gerais
- Development of a technological solution for presenting results in a web environment.

Hiring consultancy services is estimated at R\$600,000.00
