AGRICULTURE, LIVESTOCK AND PLANTED FOREST

LEGADO + ÁGUA PROGRAM (LEGACY+ WATER) – RECOVERY OF THE JURAMENTO RIVER SUB-BASIN

In the search for alternatives that reduce environmental impacts, studies were carried out by the Technical Assistance and Rural Extension Company of Minas Gerais (Emater-MG), linked to Seapa, through a diagnosis of Environmental and Productive Zoning (ZAP) in the river basin of the Juramento River, an action that contributed to making it possible to raise funds from the Ministry of Environment and Climate Change - MMA and Inter-american Institute for Cooperation on Agriculture - IICA.

The Project was prepared in 2020 and it is in the process of development and implementation, through the partnership signed between the MMA and Seapa, with the Inter-American Institute for Cooperation for Agriculture as its current funding source – IICA with a contribution of R\$ 1.5 million.

Expected Results

- Recovery of 186 hectares of degraded pastures
- Construction of 638 rainwater catchment basins
- Implementation of 83 kilometers of terracing
- Environmental adequacy of 15 kilometers of local roads
- Removal of 768.18 tons of CO₂ per year (Estimated by the GHG Protocol)
