- Conservação dos recursos naturais
- Proteção à biodiversidade
- Segurança hídrica, alimentar e climática
- Desenvolvimento sustentável dos territórios
- Aumento da qualidade de vida

SUCCESS CASES OF THE STATE OF MINAS GERAIS/BRAZIL

SUSTAINABLE DEVELOPMENT

PRA - Produce Sustainable Program

The Program is divided into four axes: structuring, strategic, tactical and operational, covering objectives, actions, targets and indicators that guide the State Forestry Institute's actions with partners in the implementation of the Forestry and Biodiversity Protection Policy in Minas Gerais. The main results obtained so far are:

- Raising resources and establishing partnerships with civil society organizations, public authorities in all spheres and with the private sector, in the environmental and productive sectors
- Holding workshops to train environmental regularization multipliers, with the participation of more than 3,000 people
- Promotion of the implementation of Demonstration Units (DU) of environmental and productive adequacy in rural properties
- Establishment of Terms of Commitment (TC) for environmental recovery through adherence to the PRA
- Strengthening local governance and municipal environmental planning, through the promotion of Municipal Plans for the Atlantic Forest and Cerrado
