

# SUCCESS CASES OF THE STATE OF MINAS GERAIS/BRAZIL

## CLIMATE FINANCING

### Public Sector

BDMG supports the public sector through an annual call for proposals (Edital); exclusive and permanent credit lines to enable urban infrastructure projects, machine and equipment purchasing, renewable energy projects, improvements in public buildings, basic sanitation, non-refundable transfers through resources of Renova Foundation to the 35 municipalities of Minas Gerais affected by the rupture of the Fundão Dam (Samarco), for sanitation and waste management; and assists technically the structure of the municipal projects and public consortiums at all stages needed to structure the concession and PPP projects.

Since 2021, both BDMG Municipal Calls for Proposals (Editais BDMG Municípios) and the permanente credit lines have expanded the focus on sustainable investment projects related to the ODS, such as: sanitation, solar energy generation, energy efficiency, public buildings modernization, inteligente cities, urban Mobility, etc.

As a result, between 2022 and 2023\*, 510 sustainable projects and 348 municipalities were supported, resulting in a total of 80,9 million dollars. The environmental and climatical projects represent 31% of the total disbursement: 25,6 million dollars for 151 projects in 107 municipalities.

We highlight the project of public lightning of the municipality of Ribeirão das Neves, where it was invested 5,6 million dollars, with 3 million dollars financed by BDMG.
