Ref. Dez. 2023

START:

- The project began in 2017.

GOAL:

- To restore Permanent Preservation Areas (APP) of rural properties located at the headwaters of the Guaxupé River Basin.

PARTNERSHIPS:

MOTIVATION AND AREA OF ACTION:

- Water Scarcity
- Regularization of rural producers regarding the Brazilian Forest Code

EXPECTED OUTCOMES (2017):

- Restore 290 hectares of Permanent Preservation Area (APP)
- Serve 95 producers
- 484 springs

Agriculture, Livestock, and Planted Forest

NEA - Environmental Education Center

The Environmental Education Center of Cooxupé was inaugurated in December 2013.

It was implemented in partnership with BASF and the Eco Space Foundation through the Mata Viva Program.

Purpose: To promote social values, knowledge, skills, and attitudes focused on environmental conservation. Partnerships with schools and civil society.

The Nursery

Goal: Conservation of Preservation Areas

30000 Seedlings Donated per Year to Members

Cooperado

Cooxupé

ESG

NEA

63000 Seedlings Capacity

Size: 35m x 25m

Reforestation Benefits

- Increases CO2 Stock
- Controls Erosion and Landslides
- Reduces Climate Change
- Protects and Conserves Fauna, Flora, and Watersheds - Biodiversity
