

## SIGMA LITHIUM - GREENTECH PLANT

SIGMA LITHIUM is a leading global lithium producer dedicated to powering the next generation of electric vehicles batteries, positioning Brazil as a leader in the global supply chain of materials for the energy transition. With environmentally and socially sustainable operations, our plant is strategically located in the Vale of Jequitinhonha, in the state of Minas Gerais and is one of the world's largest lithium producers. The demand for a rapid energy transition in the world requires changemakers and SIGMA is already delivering a sustainable lithium through its greentech Industrial Mineral Complex, achieving many of the SDGs, long before the goals set by the United Nations.

### COMBINING LARGE SCALE PRODUCTION, LOW COST, HIGHEST ENVIRONMENTAL STANDARDS IN LITHIUM.

### WE DEMONSTRATED OUR ABILITY TO EXECUTE

- Large Scale:** 5th Largest Mineral-Industrial Lithium Complex (Rock); Top 10 Global Producer (Brine & Rock)
- Low Production Cost:** Third lowest amongst peers
- Premium Lithium:** Efficiency, Savings, "Value in Use" for Customers
- ESG:** Traceability/State-of-the-Art Sustainability Standards
- Longevity:** Over 25 years of Operating Life
- Excellence:** Zero Accidents, Best in Class Team

### SIGMA LITHIUM: SHARED PROSPERITY IN NUMBERS

<b>1,500</b> Direct Jobs	<b>13,000</b> Indirect Jobs	<b>21,000</b> Job Openings (Microcredit & Small Scale Agriculture)
<b>18,000</b> People With Access to Drinking Water	<b>85%</b> Regional Workforce	<b>50%</b> Economically Active Population Beenfited
<b>270,000</b> Meals per Month	<b>20%</b> GDP Growth in Region	<b>3 Million</b> Meals per Year
