# SUCCESS CASES OF THE STATE OF MINAS GERAIS/BRAZIL

CONSERVATION

Increasing Native Vegetation Cover of Areas Destined for Restoration and Conservation

The Plan of Goals and Indicators – PMI, establishes the parameters to be achieved bimonthly by Sisema, including Goal 5 that deals with the Increase of Native Vegetation Cover Intended for Restoration and Conservation. The established goals and the cumulative result for 2022, 2023 and from January to August 2024 can be seen in the chart below:

Legend:
- meta estabelecida (ha) / Goal set (hectares)
- valor alcançado (ha) / Value achieved (hectares)

Chart data:
|	2022	2023	2024	total
Goal set (ha)	7500	15000	21000	43500
Value achieved (ha)	20329	24287	27198	71813

The main actions that contributed in 2022, 2023 and 2024 to the achievement of the goal are:

the environmental compensations imposed in the environmental intervention processes;

implementation of RPPN's and the regularization of Legal Reserve.
